# *America's Finest Grain Management Systems*

## **3 Bin Flooring Options**

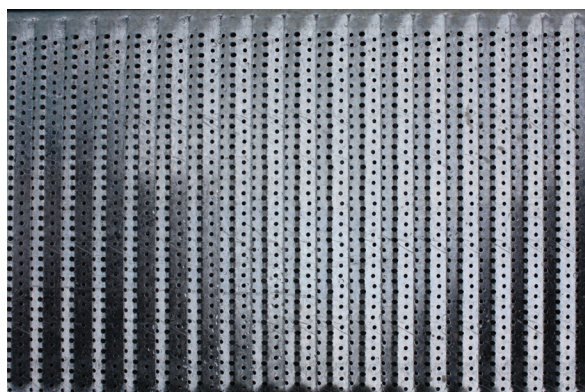

### **PERFLOCK FLOOR**

Smooth corrugated floor features 3/32" round-hole perforation for greater open area and increased airflow. These floors are a snap to clean!

### **HAWKEYE FLOOR**

Designed and fabricated for maximum strength – no material is removed during production. Ventilation is unrestricted due to lanced flooring on the hills of the corrugation.

### **RAPESEED/MILLET/CANOLA FLOOR**

Used with smaller grains – 1/16" diameter holes provide greater opening percentage for excellent airflow.
